WEBSITE MAINTENANCE

What is Web Maintenance?

Website maintenance is the systematic process of checking to see if your website is healthy and performing well.

Why Use Web Maintenance?

Website maintenance is essential because it takes care of your website's existing features – making sure they are working at all times and fixing them when they break.

Benefits of Web Maintenance

- **Increased Security:** Updates can help patch up any vulnerabilities on your site.
- **Improved Performance:** A well-maintained website will run faster and smoother than one that is not.
- **Increased Web Traffic:** A well-maintained and updated website will likely attract new visitors.
- **Improved ROI**: a well-maintained website will be more effective in achieving its goals.
